

Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	9 February 2026
Team ID	LTVIP2026TMIDS36203
Project Name	Strategic Product Placement Analysis: Unveiling Sales Impact with Tableau Visualization
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Data Integration	Import and connect sales dataset into Tableau, Clean and prepare data for analysis
FR-2	Interactive Dashboard	Display visualizations for sales by region, product category, and placement type, Provide filters for dynamic user interaction
FR-3	Comparative Analysis	Enable comparison of top-performing and underperforming product placements, Show revenue impact using charts and graphs
FR-4	Trend Analysis	Display time-based sales trends, Identify growth and decline patterns
FR - 5	Performance Insights	Highlight KPIs such as total sales, profit, and placement effectiveness
FR - 6	Dashboard Embedding	Embed Tableau dashboard into Flask-based web interface for easy access

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	The form should be intuitive and user-friendly

		with guided inputs and real-time feedback.
NFR-2	Security	Only authorized users should access the dashboard when deployed in an organization.
NFR-3	Reliability	The system must provide accurate and consistent visual insights without data errors.
NFR-4	Performance	Dashboard loading time must be quick even when handling large datasets.

NFR-5	Availability	The dashboard should be accessible anytime via web browser.
NFR-6	Scalability	The solution should support future enhancements like additional datasets, forecasting models, or advanced analytics.
