

**Project Development Phase
Model Performance Test**

Date	21 February 2026
Team ID	LTVIP2026TMIDS36203
Project Name	Strategic Product Placement Analysis: Unveiling Sales Impact with Tableau Visualization
Maximum Marks	

Model Performance Testing:

S.No.	Parameter	Values	Screenshot
1.	Form Behavior Summary	A dynamic Laptop Request Catalog Item was created in ServiceNow using Service Catalog. Fields such as Laptop Model, Justification, and Accessories are displayed conditionally. UI Policies are used to enforce visibility and mandatory logic. Reset functionality clears form data with user confirmation. Records are created only if all validations are met; else, errors are shown.	

2.	Calculation & Data Accuracy	KPI calculations including Total Sales, Profit Margin %, and Growth % were validated against the dataset and matched 100% accurately. Trend graphs correctly represent time-based sales patterns. Data refresh successfully updates dashboard visuals without errors.	
3.	System Performance & Responsiveness	Dashboard loads within acceptable time. Visual transitions are smooth. No lag observed while switching filters or performing drill-down analysis. Backend data connection verified successfully.
